Wood River Valley
Get Help!
Suicide Prevention, Emotional and Mental Health Support

A Resource Guide
A Message to Our Community

Mental illness can be acute or chronic, long or short term, and can vary in cause, symptoms, and intensity. Help for any mental health issue should be encouraged, and many resources are available in and around our community.

Like many illnesses, prevention and early intervention can reduce the impact of mental health conditions. Symptoms of mental illness can often be painful and bewildering.

But there is hope. And there is help. This resource guide can be a good place to start.

Tragically, mental illness is strongly associated with suicide. Mental health disorders, substance abuse challenges, or both, are a factor in 90% of all suicides.

Get Help is dedicated to Dex Gannon and his family. Dex grew up in the Wood River Valley, attended our schools, joined our sports program, and hiked our mountains. At the young age of 21, Dex ended his life by suicide as a result of mental illness.

His family created the first version of the Get Help resource guide as a way to inform our community about mental illness, to help create a culture that addresses the need for care and understanding when someone faces mental health challenges, and to work as a community to connect individuals and families to the resources and support available.

This guide has information about many resources that address or treat mental health in our community. However, there may be some that are not included, or resources that change after this publication. If you cannot find what you need, St. Luke’s Center for Community Health will help you explore your options. Call (208) 727-8733.

In an Emergency Call 911

“Mental illness, in all its many forms, is still just an illness, not a cause for shame. There are treatments…and there is hope.”

~ Steve Gannon

Access this booklet online at stlukesonline.org/gethelp
Mental illnesses are medical conditions that disrupt a person’s thinking, feeling, mood, ability to relate to others, and daily functioning.

Just as diabetes, asthma, and epilepsy are medical conditions that can often be managed with proper care, mental illnesses are medical conditions that can also be treated and managed.

**The good news about mental illness is that recovery is possible.**

Serious mental illnesses include major depression, schizophrenia, bipolar disorder, obsessive compulsive disorder (OCD), panic disorder, post-traumatic stress, eating disorders, and borderline personality disorder.

But mental health can also be affected by situations and occurrences throughout life that cause a disruption in one’s ability to think, feel, or function in daily life. This disruption may be temporary or long term, mild or serious.

Mental illness can affect persons of any age, race, religion, or income.

Mental illness is not the result of personal weakness, lack of character, or poor upbringing.

**Mental illness is treatable.** Most people diagnosed with a serious mental illness can experience relief from their symptoms by actively participating in an individual treatment plan.

“1 in 5 Americans suffer from a diagnosable mental disorder during any given year.”

~ World Health Organization

“Stigma and shame are the main reasons people do not seek treatment for mental illness.”

~ Center for Disease Control and Prevention

A mental health crisis is considered an emergency. Please call 911 if you or someone else is in crisis.

**Indications and Symptoms of Mental Illness May Include:**

- Feelings of depression or sadness that are disproportionate to circumstances in duration, intensity, or expression
- Withdrawal or loss of interest in friends and family or activities
- Strong feelings of anger or rage
- Abuse of alcohol or drugs
- Feelings of being trapped, like there is no way out
- Exhibiting changes in personality
- Exhibiting actions that are reckless or impulsive
- Changes in sleeping patterns
- Declining performance at work or school
- Feelings of excessive guilt or shame
- Feelings of extreme highs or lows
- Excessive fears, worries, anxiety, panic or hopelessness

If you would like assistance navigating through resources, St. Luke’s Center for Community Health can help. Please call, (208) 727-8733
If you have, or think you might have, a mental health concern talking about it might be the first step in healing.

If someone you know has, or you think they might have, a mental health concern talking about it might help them get the care they need.

When you think something might be wrong….with you, with a friend, with a classmate, with a coworker, with anyone…

Ask. Talk. Listen. Find out about services and resources. Get Help.

Do whatever it takes. You might be saving a life.

“121 million people worldwide suffer from depression.”
~ World Health Organization

If you or someone you know needs emergency mental health services, please call 911

St. Luke’s Clinic – Mental Health Services
(208) 727-8970
1450 Aviation Drive, Suite 202, Hailey, 83333 | www.stlukesonline.org
Psychiatric and counseling services for adolescents and adults.

St. Luke’s Clinics
Many St. Luke’s physicians are trained to treat patients with mental health issues. Ask your primary care physician for help or for a referral.

St. Luke’s Center for Community Health
(208) 727-8733
1450 Aviation Drive, Suite 200, Hailey, 83333 | www.stlukesonline.org
Information and referrals for any health need. Staff will help connect individuals to health care professionals including psychiatrists, physicians, licensed counselors, social service agencies, emergency services, and other resources.

Mental health services include:
• Psychiatry and mental health counseling referrals, substance abuse counseling and resource referrals, community resources, and financial support
• Free mental health screenings
• Health education talks, fitness and yoga programs, and events and screenings aimed at promoting general health and well-being
• Financial assistance for counseling, prescription medication, and other urgent needs
HELP PREVENT SUICIDE

URGENT WARNING SIGNS
• Threatening to, or talking about wanting to, die or hurt or kill self or others
• Looking for ways to kill self by seeking firearms, pills, or other means
• Talking about feeling hopeless or having no reason to live
• Talking or writing about, or having an unordinary interest in, the subject of death, dying, or suicide
• Speaking about feeling trapped or in unbearable pain
• Talking about being a burden to others

“8 out of 10 people considering suicide give some sign of their intentions.”
~Mental Health America

Communities have an important role in helping those who show warning signs.

Firearm access is a significant risk factor. There is an increased risk of suicide or suicide attempts for those who live in homes where firearms and ammunition are present. Keep firearms locked up, inaccessible, unloaded, and separate from ammunition.

KEY RISK FACTORS
• Prior suicide attempts
• Major depression
• Substance use disorders
• Other mental health or emotional problems
• Chronic pain
• Post-traumatic stress
• Traumatic brain injury
• Recent loss or event leading to shame, despair, or humiliation

24-HOUR MENTAL HEALTH HOT LINES

Crisis Hotline
(208) 788-3596
P.O. Box 939, Ketchum, 83340 | www.thecrisishotline.org

Search the internet, look in local phone books, or ask a social service agency, your employer, your physician, or someone else you know to find out where you might find additional support for the health and well-being for yourself or someone you care about.

Mental health and well-being can be affected by many things, including stress from such things as financial hardship, food insecurity, homelessness, illness, injury, family and relationship issues, and unemployment. Many programs and services are available in our community to address these and other issues.

Call St. Luke’s Center for Community Health to find out more about the resources available in and around our community, (208) 727-8733

WANT TO VOLUNTEER? ARE YOU ABLE TO MAKE A DONATION?
Most organizations welcome and thrive on volunteerism and donations. Please call the organization of your choice for more information about how to get involved.
The St. Luke’s Wood River Foundation believes that investments in the treatment of mental health issues are crucial to the health of our community as a whole.

Generous contributions from The Foundation have helped to fund the publication of this Get Help resource guide.

To learn more about St. Luke’s Wood River Foundation, or to make a gift to support our mental health services or other programs, call (208) 727-8416 or visit www.slwrf.org
